Cinderella Swamp Milkweed

Cinderella' Swamp Milkweed's vanilla-scented flowers are a treat for the senses. Deep pink petals with white centers bloom in 2" wide clusters. Compact in form, 'Cinderella' makes an excellent choice for small, sunny gardens and performs well in low spots and moist areas. Like all swamp milkweeds, 'Cinderella' is a vital host plant for Monarchs, providing essential food and habitat for both the growing caterpillars and adult butterflies.

This is one of the most beautiful milkweeds. Not the common dusty-dull rose-flowered farm weed, but a really beautiful red-flowered form with much more refined foliage and habits. And like the orange-flowered Butterfly Weed, this one is a monarch magnet, great for butterfly gardens.

Bloom time-summer to fall. 36-48" tall, 12-36" wide. Full sun. Average, Moist / Wet soil. Attract Butterflies, Attract Hummingbirds, Attract Birds, Deer Resistant, Rabbit Resistant, Native, Fragrant Flower / Foliage, Extended Bloom Time (more than 4 weeks).

Fireball Bee Balm

Fireball is a compact growing hybrid with a mid-summer display of bright scarlet-red flowers over glossy green foliage. Compact, clump-forming perennial boasting masses of vibrant scarlet red flowers, Highly attractive to hummingbirds and butterflies. Their vibrant color is set off to perfection by the fresh green leaves, which are very fragrant and is perfect for the front of the border, containers and small gardens. Makes excellent cut flowers.

Performs best in full sun or partial shade. It is not too fussy about soils as long as they are consistently kept moist. Mature height 1-2 ft. Deer and rabbit resistant.

Cat's Meow Catmint

Cat's Meow Catmint has masses of beautiful spikes of lightly scented sky blue flowers with purple calyxes rising above the foliage from early summer to early fall, which are most effective when planted in groupings. Its small fragrant pointy leaves remain grayish green in color throughout the season.

This tidy, dense, rounded variety tends to keep its shape all season long; small gray-green leaves are topped with well branched stems, carrying spikes of sky-blue and purple flowers; looks great all season in beds and borders

It is a good choice for attracting butterflies to your yard but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations and should do just fine under typical garden conditions. It is not particu-

lar as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. Cat's Meow Catmint is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. Note that when growing plants in outdoor containers and baskets, they may require more frequent watering than they would in the yard or garden. Hardy to USDA zone 3
